3D POHLAD

A 3D perspective view of the building model, showing the roof, walls, and structural elements. The building is a rectangular structure with a flat roof and a brick-like texture on the walls. The perspective view shows the building from an elevated angle, highlighting the roof and the side walls. The structural elements, including the columns and beams, are visible, showing the internal framework of the building. The building is supported by several concrete pillars. The roof is white and has some small square and circular features. The walls are made of a brick pattern. The overall structure is a simple rectangular box with a flat roof and a brick-like texture on the walls.
